Professional Summary

Product Designer with 3 years of experience leading projects from discovery to delivery across healthcare, mobility, and operational products. Currently the lead Product Designer for a Pfizer digital healthcare team at Tata Consultancy Services Brazil, owning complex web workflows from requirements and prototyping through handoff and functional validation. Also introducing user research practices, including the team's first usability testing initiative, while using Figma Make and Rovo to accelerate design exploration, writing, and strategic thinking.

Professional Experience

Tata Consultancy Services

Product Designer | Pfizer Account | February 2026 – Present

- Serve as the primary Product Designer for a Pfizer digital healthcare team, owning complex web experiences from requirements and prototyping through engineering handoff and functional validation.
- Design and improve operational dashboards, scheduling tools, team-management features, authentication flows, and patient-related workflows.
- Collaborate directly with the Product Owner, business stakeholders, and engineers to clarify requirements, present design decisions, and deliver incremental product improvements.
- Introduce user research practices to the team, including planning its first usability test with interactive prototypes to support evidence-based product decisions.
- Use Figma Make to accelerate interface exploration and component iteration, and Rovo to support writing, requirements analysis, communication, and strategic thinking.
- Maintain product documentation and delivery traceability through Jira and Confluence while validating new features before release.

Kiwano Tecnologia

Product Designer | December 2023 – February 2026

- Lead end-to-end product design from discovery to delivery, aligning user needs, business goals, and technical constraints across cross-functional teams.
- Conduct user research, stakeholder interviews, and usability testing, translating insights into validated solutions and reducing rework during development.
- Conduct market and competitive analysis to identify product gaps and opportunities for improvement, directly influencing product strategy and roadmap decisions.
- Designed high-fidelity interfaces and interactive prototypes, producing UX documentation, diagrams, and mockups that accelerated decision-making and improved design-to-engineering handoff efficiency.
- Collaborate closely with developers throughout implementation and QA to ensure design consistency, usability, and on-time delivery.

- Contributed to the launch of multiple products, including a vehicle tracking mobile app and a professional training scheduling platform, with a strong focus on usability and user satisfaction.

Product Designer | Project - New Maps

- Led the unification of Android and iOS navigation into a single Flutter architecture, reducing the total number of screens by ~32% and significantly lowering UX and maintenance complexity.
- Designed a unified cross-platform navigation system that cut average navigation depth from 5 to 3 levels, improving task efficiency across critical user flows.
- Simplified core product flows (reports, commands, map actions), reducing user steps by up to 50% in high-frequency interactions.
- Eliminated 100% of duplicated Android and iOS flows by consolidating them into scalable, parameterized Flutter experiences.
- Standardized navigation patterns across platforms, reducing inconsistent interaction models by an estimated 70% and improving usability and learnability.
- Optimized information architecture to support future feature scalability, enabling faster development cycles and consistent UX delivery across platforms.

DBV Pioneiros do Paraná

UX Designer & UX Research | April 2022 – June 2022

- Identified critical operational gaps through in-depth interviews and desk research with volunteers and coordinators in a social impact organization.
- Synthesized research insights into clear design decisions, focusing on organization, traceability, and continuity of activity records.
- Designed and delivered an end-to-end system to register, organize, and maintain historical records of activities with children and adolescents.
- Reduced reliance on informal and manual processes, improving information organization and long-term accessibility for volunteers.
- Delivered a scalable hybrid solution (digital + printed materials) that supported real-world volunteer workflows and enabled continuous use.

Skills

Product Design & UX

Product Design, UX Design, User-Centered Design, Accessibility (A11y), Design Strategy, Information Architecture, Interaction Design

Research & Validation

User Research, Research Planning, User Interviews, Stakeholder Interviews, Usability Testing, Prototyping, Insight Synthesis, Requirements Gathering, Functional Validation

Tools & AI

Figma, Figma Make, Atlassian Rovo, Miro, Jira, Confluence, Balsamiq, Flowchart, ClickUp, Notion

Strategy & Collaboration

Product Discovery, Benchmarking, Design Documentation, Cross-functional Collaboration, Agile Environments, Product Handoff

Education

Specialization in User Experience and Beyond – Pontifical Catholic University of Rio Grande do Sul (PUCRS) – February 2026 – Expected February 2027

Bachelor of Law – Faculdade Pitágoras – Paraná, Brazil – 2015–2019

Certifications

Google UX Design Professional Certificate – Google

Create High-Fidelity Designs and Prototypes in Figma – Google

Build Wireframes and Low-Fidelity Prototypes – Google

Conduct UX Research and Test – Google

User Experience – FIAP
